Strategic Technology Solutions

The partner-of-choice for your business technology needs.
Technology plays an essential role in the daily operations of business. Stratix Systems' solutions help deliver the results you can count on.

IT Services: Your technology backbone.

We believe that an outstanding digital backbone—your computing and network environment—breeds a healthier and more successful organization.

Stratix Systems can support your business' unique IT requirements in one, or a combination, of two ways:

Do not have a full-time IT staff:
Stratix is capable of handling our clients' IT environments in their entirety—including server administration, desktop support, network setup, IT strategy and budgeting, and more. Essentially, Stratix Systems becomes their IT department.

Have a full-time IT department:
Stratix will augment our clients' existing IT staff on a regular or as needed basis—including real-time network monitoring, second-level support, assistance with large-scale or specific projects, and more.

- PCs and Laptops
- Servers and Virtualization
- Networks
- Security
- E-mail
- Backup and Disaster Recovery
- Network Assessments

Document Management: Information for all.

Today, information is the lifeblood of business—and people need to have access to it from anywhere and everywhere 24/7.

Stratix Systems' goal is to help you entirely manage that information (and the documents in which it's contained) as effectively and efficiently as possible.

Our Electronic Document Management solutions allow you to capture, store and organize documents, data, images and the like. This enables immediate and reliable access to critical information whenever and wherever it's needed.

To accomplish this, our Business Analysts can conduct a thorough Document Workflow Analysis in order to pinpoint your specific pains—whether it's controlling costs, disaster recovery, compliance or simple efficiency. Then, Stratix will provide recommendations for an EDM solution that helps you achieve your business goals.

- Microsoft SharePoint
- Document Storage and Retrieval
- Workflow Automation
- Business Process Optimization

Imaging: Smarter, more cost-effective printing.

The printed document is a tremendously important part of every business' daily work activity—no matter if it's sale orders, marketing materials, packing slips, human resources papers, specialty pages and so much more.

Organizations require reliable printing and imaging devices—multi-function systems (MFPs), printers and copiers, duplicators, etc.—that can easily connect to their networks and produce accurate, high-quality documents at a cost-effective rate.

Stratix Systems has a complete line of full-color and black-and-white printing and imaging systems from Ricoh—the industry's global leader—that can be scaled to meet your specific printing needs (color/BW, volume, speed, etc.) while delivering maximum ROI.

- Multi-functional Systems
- Printers
- Production Print
- Digital Duplicators
- Wide-Format Devices
- Fax (Device and Desktop)
- Toner, Supplies and Maintenance

No one knows technology solutions like Stratix.

think outside the BOX

Let Stratix be your business enabler.

Every day, companies rely on technology to play an important role in virtually all aspects of their business. But, without the right partner to assist you, even the best technology can't solve the challenges that limit productivity and growth.

Stratix Systems views technology as a key business enabler. We take the time to understand your objectives and goals before recommending a technology solution that drives business forward—for a single department or an entire enterprise.

Our solutions ensure your people, systems and information are able to work together swiftly, easily and without interruption. When this happens, business simply becomes better.

Off-load the burden of managing your everyday business technologies with Proactive Managed Services from Stratix Systems.

Proactive is Stratix Systems' family of managed technology services, offering a revolutionary selection of solutions to organizations that require support for their everyday business technologies, but may not have the necessary time, knowledge and/or budget.

Our Proactive Managed Services are delivered via "single-point support," which saves clients time and money, as well as achieves accountability by being more...

- **Personalized:** we understand your business' needs and provide services and support when, where and how you want it.
- **Proactive:** we help you get ahead of the game by leveraging technology to avoid problems and optimize performance.
- **Simplified:** we provide you a straightforward offering and single point of contact throughout the support experience.

Proactive: Managed Network Services

Unlike the traditional "break-fix" method, which places an emphasis on reacting to problems that have already occurred, Proactive: MNS takes a forward-thinking approach by monitoring your business systems in real-time, conducting routine maintenance and housekeeping tasks, identifying problems before they can impact business, and resolving issues remotely or by dispatching technicians to your site.

Proactive: E-mail Management and Hosting

E-mail is the most widely used method of business communication—it's how people within your organization connect with customers and each other. But planning, installing and managing an in-house e-mail server can be complicated and costly. Proactive: E-mail simplifies your efforts with a cloud-based solution for advanced e-mail security, hosting, replication, archiving and more, including easy Exchange integration.

Proactive: Backup and Disaster Recovery

Severe weather, fire, human error, hackers, malware—as a business professional, you are aware of these risks. Proactive: BDR saves you time and money with simple, secure and affordable backup solutions for files, programs, settings and more. All information is stored on a local backup device and replicated to two secure off-site data centers, resulting in complete data integrity—regardless of any failure or catastrophe that may occur.

Proactive: Managed Print Services

What if your printing systems could order their own supplies, call for service the moment they needed it or automatically direct jobs to more cost-effective devices? Proactive: MPS is a comprehensive solution, where Stratix Systems takes on the responsibility of fully managing and maintaining your print fleet—alleviating the burden of maintenance and supply ordering, while improving productivity and reducing hard costs by as much as 30%.
